

To install the Embrilliance Thumbnailer you must have at least version 10.5 of OSX.

Launch the install program :

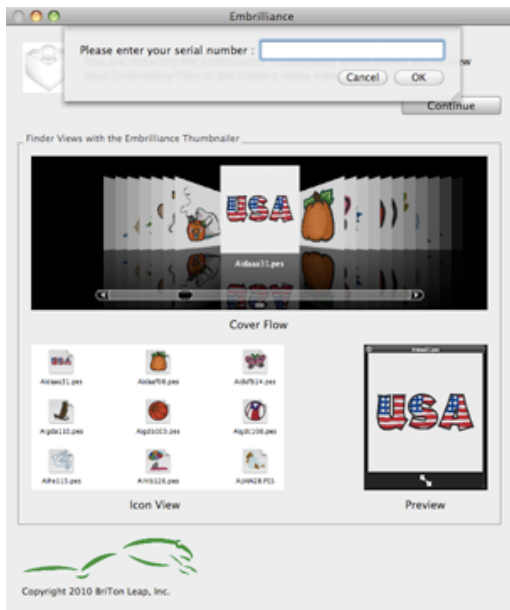

Embrilliance Thumbnailer  
Installer

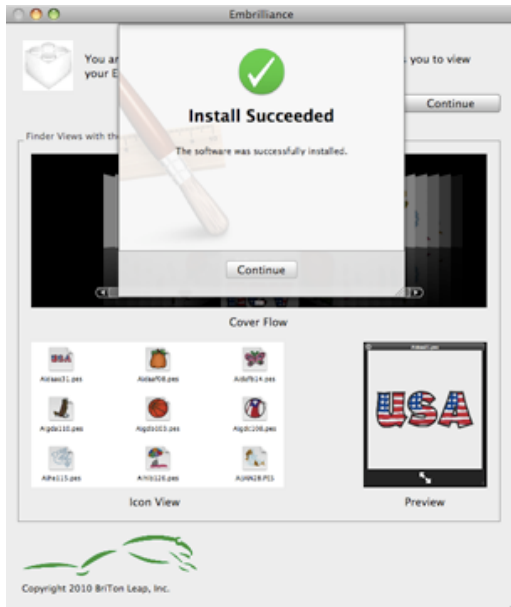

You will see this window :

Click the Continue button, you will asked for you serial number, enter the serial number and click OK.

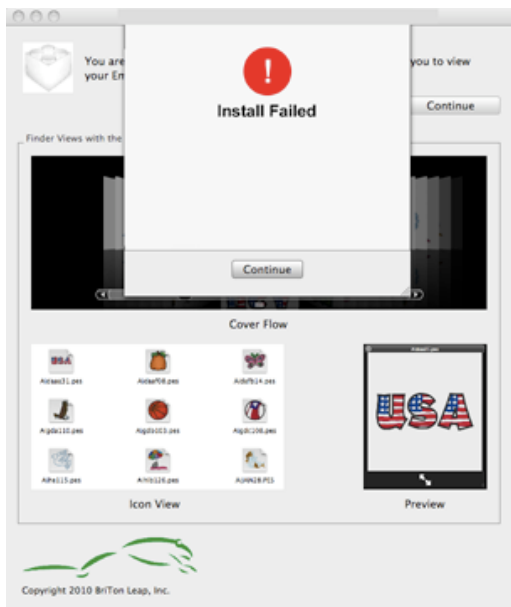

If the install is successful you will see :

Click Continue and you are done !

If the install is not successful you will see :

Click Continue and the installer closes.

The only reasons for failure are :

1. An incorrect version of OSX 10.5 and above required.
2. The software has already been installed.
3. There is an error in your system drive configuration.

/Library/QuickLook

must exist at the root of your boot disk

/username/Library/PreferencePanels

must exist in the user directory
